

for top temperature and pressure resistance

PUMP APPLICATIONS

Pumps can be used to transport liquids, solid-liquid mixtures and compounds with the consistency of paste and to build up pressure. Pumps differ according to their function and design. BIRKOSIT Dichtungskitt[®] can basically be used in standard pumps, displacement pumps and jet pumps of all sizes.

BIRKOSIT Dichtungskitt[®]

Be on the safe side when it comes to sealing.

Pumps are often found in heavy-duty environments where the seals are subject to very high levels of stress. A 100% seal is guaranteed with the use of BIRKOSIT Dichtungskitt[®]. What is more, BIRKOSIT Dichtungskitt[®] boasts impressive resistance to fluids, exceptional durability, temperature resistance, pressure resistance and permanent elasticity.

BIRKOSIT Dichtungskitt[®] can save a lot of time and money, especially during inspections and unscheduled downtimes. In case of disassembly, the components can be cleaned quickly and easily.

Further possible applications:

BIRKOSIT Dichtungskitt[®] can be used to optimise seals with solid materials. It is also suitable for use on surfaces as a replacement for conventional seals, such as the following:

- O-rings
- Flat gaskets
- Rubber
- Paper
- Asbestos
- Graphite
- Metal gaskets
